

1 **In the Claims:**

2

3 1. (Currently Amended) A processor-readable medium comprising

4 processor-executable instructions configured for:

5 scrolling a number of images across a display screen of a digital camera;

6 locking an image in place on the display screen; and

7 scrolling images behind the locked image.

8

9 2. (Original) A processor-readable medium as recited in claim 1,

10 comprising further processor-executable instructions configured for varying the

11 speed of the scrolling.

12

13 3. (Currently Amended) A processor-readable medium as recited in

14 claim 2, wherein the varying the speed of the scrolling is selected from the group

15 ~~comprising~~consisting of:

16 fast-forwarding the scrolling;

17 slowing the scrolling;

18 reversing the scrolling;

19 pausing the scrolling; and

20 resuming the scrolling after the pausing.

21

22 4. (Cancel)

23

24

25

1 5. (Original) A processor-readable medium as recited in claim 4,
2 wherein the locking an image comprises justifying the image at one edge of the
3 display screen.

4
5 6. (Original) A processor-readable medium as recited in claim 4,
6 comprising further processor-executable instructions configured for:
7 unlocking a locked image;
8 locking a new image in place on the display screen; and
9 scrolling images behind the new image.

10
11 7. (Original) A processor-readable medium as recited in claim 1,
12 comprising further processor-executable instructions configured for altering the
13 number of images being scrolled across the display screen.

14
15 8. (Original) A processor-readable medium as recited in claim 1,
16 comprising further processor-executable instructions configured for driving an
17 external display screen with the digital camera such that the multiple images are
18 scrolled across the external display screen.

1 9. (Currently Amended) A processor-readable medium as recited in
2 claim 8, wherein the external display screen is selected from the group
3 ~~comprising~~consisting of:

4 a television screen;

5 a high definition television screen having a widescreen format; and

6 a computer monitor.

7
8 10. (Currently Amended) A processor-readable medium as recited in
9 claim 1, wherein the scrolling comprises moving the images across the display
10 screen in a direction selected from the group ~~comprising~~consisting of:

11 a left to right direction across the display screen;

12 a right to left direction across the display screen;

13 a top to bottom direction across the display screen; and

14 a bottom to top direction across the display screen.

15
16 11. (Original) A processor-readable medium as recited in claim 1,
17 wherein the scrolling comprises presenting the images beginning with a most
18 recently captured image and progressing toward a least recently captured image.

19
20 12. (Original) The digital camera comprising the processor-readable
21 medium as recited in claim 1.

1 **13.** (Currently Amended) A method comprising:
2 capturing images with a digital camera;
3 storing the images in a memory of the digital camera; and
4 displaying the images as a scrolling slideshow on a display screen of the
5 digital camera;
6 locking an image in place; and
7 scrolling other images.

8
9 **14.** (Original) A method as recited in claim 13, further comprising:
10 fast-forwarding the scrolling slideshow;
11 slowing the scrolling slideshow;
12 reversing the scrolling slideshow;
13 pausing the scrolling slideshow; and
14 resuming the scrolling slideshow after the pausing.

15
16 **15.** (Currently Amended) A method as recited in claim 13, further
17 comprising:
18 ~~locking an image in place;~~
19 justifying the locked image at one side of the display screen; and
20 wherein scrolling other images comprises scrolling the other images behind
21 the locked image.

1 **16.** (Original) A method as recited in claim 13, wherein the displaying
2 comprises displaying the images as a scrolling slideshow on an external display
3 coupled to the digital camera.

4
5 **17.** (Currently Amended) A digital camera comprising:
6 a display screen;
7 captured images; and
8 a scrolling slideshow module configured to scroll the captured images
9 across the display screen—~~in~~, thereby performing a scrolling slideshow, and
10 configured to lock one of the captured images in place during the scrolling
11 slideshow.

12
13 **18.** (Currently Amended) A digital camera as recited in claim 17,
14 wherein the scrolling slideshow includes scrolling control features selected from
15 the group ~~comprising~~ consisting of:

16 scroll pause;
17 scroll resume;
18 scroll speed;
19 scroll direction;
20 image locking; and
21 image unlocking.

22
23 **19.** (Original) A digital camera as recited in claim 18, further comprising
24 a controller configured to manipulate the scrolling control features.
25

1
2 **20.** (Currently Amended) A digital camera as recited in claim 17, further
3 comprising a memory configured to store image data, the memory selected from
4 the group ~~comprising~~consisting of:

5 an internal memory configured as part of the digital camera; and

6 a memory that is distinct from the digital camera, insertable within the
7 digital camera, and removable from the digital camera.

8
9 **21.** (Original) A digital camera as recited in claim 17, further comprising
10 an audio/video output terminal configured to couple the digital camera to an
11 external display device, the scrolling slideshow module further configured to
12 format the images for scrolling across the external display device.

13
14 **22.** (Currently Amended) A digital camera comprising:
15 means for capturing light on an electronic light sensor;
16 means for converting the light into digital data representing a plurality of
17 images; and
18 means for scrolling the images across a display screen as a scrolling
19 slideshow; and
20 means for locking an image in place on the display screen during the
21 scrolling slideshow.

1 **23.** (Original) A digital camera as recited in claim 22, wherein the
2 means for scrolling the images across a display screen comprise:

3 means for outputting the images to an external display screen; and

4 means for formatting the images for display on the external display screen.

5
6 **24.** (Currently Amended) A digital camera as recited in claim 22,
7 wherein the means for scrolling the images across a display screen comprise:

8 means for pausing the scrolling;

9 means for resuming the scrolling;

10 means for changing direction of the scrolling;

11 means for changing speed of the scrolling; and

12 ~~means for locking an image in place on the display screen; and~~

13 means for unlocking a locked image.

14
15 **25.** (Currently Amended) A digital camera as recited in claim 22,
16 wherein the means for scrolling the images across a display screen comprise:

17 means for increasing ~~the~~ a number of images being scrolled across the
18 display screen; and

19 means for decreasing the number of images ~~begin being~~ being scrolled across the
20 display screen.
